

ABOUT

DSRIP is a program of NYS DOH and the Centers for Medicare and Medicaid Services. SI PPS is one of 25 across NY State working to re-invest \$6.42 billion dollars in improving the healthcare delivery system.

WHO WE ARE

The Staten Island Performing Provider System (SI PPS) is a new non-profit collaboration of over 50 health and social providers on Staten Island. Co-led by Richmond University Medical Center and Staten Island University Hospital, our goal is to implement the Delivery System Reform Incentive Payment (DSRIP) Program.

OUR MISSION

To engage partners and stakeholders to transform and improve the health and wellness of our community.

REACH

To improve quality of healthcare for Staten Island's 130,000 Medicaid and 50,000 uninsured residents.

Improving overall population health

GOAL

25%

reduction in avoidable hospital use over 5 years.

11 PROJECTS

Patient Activation

Chronic Disease Preventive Care

Integrated Primary Care & Behavioral Health

Mental Health & Substance Abuse Infrastructure

Withdrawal Management

Palliative Care in Nursing Homes

Diabetes Disease Management

Health Home At-Risk

Care Transitions

Hospital/ Home Care Collaboration

INTERACT in Nursing Homes

IMPROVEMENTS TO EXPECT

Improved access to health and well care

Care coordination

Focus on developing partnerships with community based organizations

Using technology to share health information and improve outcomes

Improving health literacy and health communication

Partnerships between your community, health care and social service providers

Connecting people to the right health and social services in their community

Removing language and cultural barriers to care

Addressing the social determinants to health (education, food, policy, transportation, housing)

Building healthy neighborhoods

MORTALITY RATES

Staten Island has the highest overall mortality rates of any NYC borough.

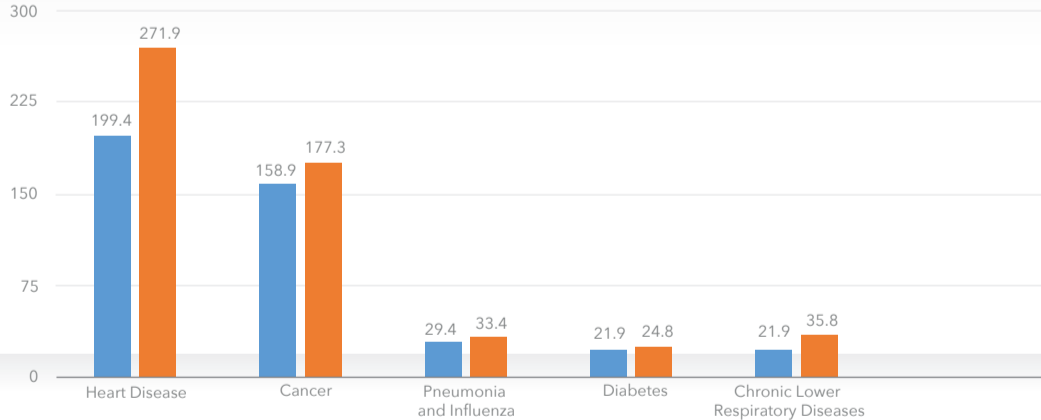

Deaths per 100,000 residents per year

- Staten Island per 100,000
- Queens per 100,000
- Bronx per 100,000
- Manhattan per 100,000
- Brooklyn per 100,000

SI Rate per 100,000

NYC Rate per 100,000

The leading causes of death on Staten Island are heart disease and cancer. Staten Island's heart disease and cancer mortality rates are significantly above NYC aggregate rates.

PARTNERS
